

Youssef Waheed Mohamed

Software Engineer

Cairo, Egypt

youssefwaheed279@gmail.com | +20 101 893 1181 | LinkedIn | GitHub

Summary

Software Engineer with a strong foundation in full-stack development and application security, built through three years of self-driven study before graduating. Combines backend engineering experience with FastAPI, PostgreSQL, and Redis with practical security knowledge, including web penetration testing and OWASP methodology. Focused on writing secure, maintainable, and well-structured code.

Education

B.Sc. Computer Science & Physics

2021 – 2025

Zagazig University, Egypt

Technical Skills

Tech Stack: Next.js, FastAPI, React, OOP, TypeScript, PostgreSQL, Redis, SQLAlchemy, Python, SQL

Security: OWASP Top 10, Web Penetration Testing, Burp Suite, Nmap, Wireshark, Metasploit, OAuth2, JWT, Linux

Networking: CCNA, TCP/IP, Network Security (Self-study)

Soft Skills: Problem Solving, Teamwork, Communication, Analytical Thinking

Professional Experience

Full-Stack Software Engineer · Freelance

Oct 2025 – Present

Saudi Equities Fintech Platform

- Built secure authentication with JWT and refresh token rotation, Redis-backed token blacklisting, and Argon2 password hashing, including account approval workflows and failed login tracking.
- Designed a multi-level caching layer with tiered TTLs using a read-through pattern to reduce repeated database queries on price history and screener endpoints.
- Built REST API endpoints serving financial queries, including RS ratings, technical screeners, XBRL parsing, and market breadth analysis.

Projects

E-commerce Platform · Python & Django

GitHub ↗

- Built a Django storefront with product listings, add-to-cart actions, and checkout processing.
- Developed customer, order, and shipping models with authenticated and guest purchase handling.

Social Media Application · Node.js & React

GitHub ↗

- Built JWT-authenticated user registration, login, and profile management for MongoDB-backed accounts.
- Developed post, like, comment, and profile CRUD APIs with Express and Mongoose.

Color Sorting System · University Project

2025

- Led software development for an embedded hardware system; earned an Excellent grade and 2nd place at the university Scientific Conference.

Certifications & Training

- Udemy: React — The Complete Guide (Certificate)
- Udemy: Node.js, Express & MongoDB (Certificate)
- Self-Study Path: OSCP, CompTIA Security+, CCNA, Network+, A+
